Dear Mr. Smith:

AtkinsRealis is pleased to provide the Truckee Meadows Water Reclamation Facility (TMWRF) with the following scope and fee for the first year of manhole and piping rehabilitations.

Project Background:

AtkinsRealis assisted TMWRF to evaluate the condition of on-site manholes and drainage facilities. Structure components were analyzed and trends in manhole conditions were observed. Based on conditions observed, a multi-year manhole and piping rehabilitation program was determined to be the best rehabilitation implementation strategy.

Project Description Summary:

The attached figure outlines the limits of YEAR ONE rehabilitations as described in the Site-Wide Rehabilitation Assessment. AtkinsRealis to determine the best method of rehabilitation as well as provide contract documents (Plans, Specifications, and Cost Estimate) for these rehabilitations. AtkinsRealis understands that TMWRF requires Bid ready documents by March 2025 and intends to gain TMWRF project concurrence through submission of a 15% completion deliverable prior to updating to final submission quality level.

AtkinsRealis to consider site drainage, and process chemistry during evaluation. Possible pipe rehabilitation methods include removal and replacement or in situ rehabilitation technology such as cured in place thermoplastic pipe liners as well as structural epoxy spray liners. Manhole rehabilitations could be a spray lining system and/or removal and replacement. AtkinsRealis understands that proactive communication with TMWRF staff will be a high priority in order to reduce project constraints on other TMWRF projects, maintenance activities, and overall facility operations.

If you have any questions or require additional information, please feel free to contact me by phone at 775.789.9817 (office) or by email at Eric.Berg@atkinsrealis.com. We look forward to supporting TMWRF on this project.

Assumptions:

Delivery will be electronic only, No hard copy will be delivered

Design Justification Addendum will be an alternative analysis between two options:

- 1) Keep existing piping and manholes, Utilize spray liners and CIPP pipe replacement
- 2) Remove and replace while trying to reduce bends, reduce turbulence to reduce future wear; Current Drainage best practices
- 3) With either option, research to determine best manholes, and piping available to reduce corrosion
- 4) Assuming up to 20 Drawing Sheets

Bid Documents:

Based on 15% Plans and Rehabilitation Justification Addendum:

If decided to use CIPP and Manhole lining:

Update Manhole E Bid Documents.

Update Specifications

Markup Asbuilts for Plans

Update Manhole E Cost Estimate

If decided to remove and replace:

Create new Specifications based on other pipeline removal and replacement project

Create CAD Plans, review asbuilts for conflict analysis

Create new cost estimate based on removal and replacement
