**Subject:** IMPORTANT PLEASE READ!

I a citizen who resides in reno nevada have a complant about the city. I my self am HOMLESS, I get up every day to go to work, under the table, I pay taxes I abide by the laws. I dont find it appropriate to target homeless people that are trying to get back on their feet. You've taken a lot of peoles homes away by passing a law saying that we can't have motor homes or trailers on the street. The city of reno doesn't understand what the struggle ls like to keep your home I worry every day I get up where, I'm going to have to move my trailer, or weather my trailer will be there when I get off work I've been harassed by parking enforcement due to people who LIVE IN ACTUAL HOUSES who made a complant about my trailer that's not on there property nor in front of their home, as well as a good distant away from their homes. It's so unfair to us homeless people who do own a trailer or motor home we are trying as well to live an get by the city makes it hard for us homeless people. I clean up my area I make sure I dont have trash around I also make it know that I won't be an area for long to whom every I park by I used to reside in front of my grandmother's house until I had a police officer come at me rude an hostile saying that my trailer will be towed without warning multiple times I dont appreciate the problems I have been dealing with thanks to this new law I feel you guys should target more homeless people who don't wish to do better for them self homeless leople who are squatting in tents an tarps on the sides of roads an government property's you need to train your parking enforcement to know the. Difference between a abound vehicle an one that isn't I have never in my life had to struggle like this. If my trailer does get towed aka my HOME I WILL BE VERY UPSET please please please make sure this email can be addressed to the city of Reno council because it's a big problem an it will be a big situation I feel soon to many homeless people are being harassed that actually do an are trying to get there life back on track

Good morning,

We received this email from Washoe County, which appears best suited for public comment. Please see below.

Thank you!

**Subject:** Lithium plant concerns

Dear Washoe County Code Officials,

As a resident of Stead, I am writing to express my deep concerns regarding the proposed Lyten lithium-sulfur battery gigafactory in our neighborhood. While I understand the potential economic benefits this project may bring, I believe the risks and negative impacts on our community far outweigh any advantages.

First and foremost, I am troubled by the apparent disregard for the safety and well-being of Stead residents. It seems that external self-interests are driving investment in our neighborhood, and we are suffering as a result. The decision to cancel the Reno Air Show due to safety concerns related to development, only to replace it with a potentially more dangerous year-round industrial facility in our backyards, is both ironic and alarming.

Our infrastructure is already severely lacking, and this massive project threatens to overwhelm our community further. The roads in Stead are inadequate for current traffic levels, let alone the increased industrial activity this plant would bring. Our water supply is already strained, and the quality is poor. How will this facility impact our already limited resources?

Safety concerns are paramount:

1. Fire and Explosion Risks: Lithium battery production carries significant risks of fires and explosions. Our local emergency services are not equipped to handle such industrial accidents.

2. Chemical Exposure: The use of hazardous materials in battery production puts our community at risk of chemical exposure, especially in the event of an accident.

3. Environmental Impact: The 125-acre campus will undoubtedly affect our local ecosystem. What studies have been done to assess the long-term environmental consequences?

4. Air and Water Quality: How will the facility ensure that our air and water are not further contaminated?

The proposed plant also raises serious quality of life issues:

1. Noise Pollution: Industrial activity of this scale will likely increase noise levels in our residential areas.

2. Property Values: The presence of a large industrial facility could negatively impact our property values.

3. Community Character: This development threatens to fundamentally alter the character of our neighborhood.

Furthermore, I am concerned about the lack of transparency and community involvement in this process. It appears that decisions are being made without adequate input from those of us who will be most affected.

I urge you to reconsider this project and prioritize the needs and safety of Stead residents over external economic interests. At the very least, we demand:

1. A comprehensive environmental and safety impact study
2. Full transparency on all aspects of the project
3. A clear plan for infrastructure improvements to support this development
4. Guarantees for the safety and well-being of residents
5. A community-driven decision-making process

Our neighborhood should not be sacrificed for the sake of industrial development. We deserve to have our voices heard and our concerns addressed.

I look forward to your response and to seeing concrete actions taken to protect our community.

Sincerely,

Laura Henry

**Hello, my name is Angie or Andrea at nutria and I'm calling in regards to the power bills. Are the power company. They are outrageous and utilities are 2 expenses. Um, now we want to charge charging you by the kilowatt. That's ridiculous. You're gonna start doing that. That's like going to a nail salon and getting 1 finger done. You don't get them just 1 bigger than you, get both hands done. So this is ridiculous. I live in a small bedroom, 1, bedroom apartment and my power bill is always over a hundred dollars. I don't understand that I'm not running a lot of electricity so for them to do that is this wrong, they're driving around in brand new trucks and it's just not, right? I don't even have a vehicle. And also, as I was saying it's, um, them doing that is causing maybe some homeless people to be on the street because they can't afford to pay rent, utilities and food and they're, you know, people are starving and they keep raising the rates. I don't understand and I don't feel it's fair to people, and my power bill. Is expensive and I'm struggling as it is. I don't need any, you know, any more piled on me. Anyway, thank you so much for your attention to this matter and um we should be able to vote for that if they're going to increase the rates. Because that's not right. You better energy makes a lot of money. A lot of money. Thank you.**

**Hello. My name is Andy Rica and um, I'm closing. Um, maybe I need some help like because I think I need to go speak in another city council meeting but it's in regards to the power company. Um now they like want to charge you by the chill a lot. That's ridiculous. Why they should be a flat rate for electricity, it shouldn't be whatever they feel like charging you this much and then they got a new rate and an old rate old rate was 5 months and jumped up to 21 dollars. Why is it a new rate? I don't want to pay for that. I want things to be, be charged, 1, flat rate, not because it's a disaster relief, for whatever you have to pay into, come on. 4. I live in Section 8 of a \$7 a month, thank you. You guys helped me get it. But my point is that the power company is charging, too much money for simple power, why? Um, I'm sorry but I think it's way out of line and should be illegal because there's an old Tower Source you can go to and you have to have electricity and then I can't even run my heater. So I'm going to freeze this year because I'm scared to of turn on my here cuz what power bill is going to be 3 or 4 hundred dollars a month. Come on I can't afford that. I don't know nobody, you can. Really just seems to be investigated because, um, they asked you to check your mirror, well, 1 time, you went, um, some my ex, um, the people who lived here previously on their meter and it was like over a hundred bucks, too. Come on. You guys because we have to pay for power. And it's not right, we're paying this much money for it. Period. Period. I hate opening my power bill. I can open it before 1 once every 5 minutes. I pay 100 bucks. So that was it. Now this time it's always over a hundred dollars. Like I live in a small bedroom apartment.**
