

NRS 279.416 Declaration of state policy: Necessity of redevelopment of blighted areas. It is found and declared that there exist in many communities blighted areas which constitute either social or economic liabilities, or both, requiring redevelopment in the interest of the health, safety and general welfare of the people of those communities and of the State.

NRS 279.418 Declaration of state policy: Growing menace of blighted areas to public health, safety and welfare; benefits to inhabitants resulting from remedying conditions. It is further found and declared that:

1. The existence of blighted areas constitutes a serious and growing menace which is condemned as injurious and inimical to the public health, safety and welfare of the people of the communities in which they exist and of the people of the State.
2. Such blighted areas present difficulties and handicaps which are beyond remedy and control solely by regulatory processes in the exercise of the police power.
3. They contribute substantially and increasingly to the problems of, and necessitate excessive and disproportionate expenditures for, crime prevention, correction, prosecution and punishment, the treatment of juvenile delinquency, the preservation of the public health and safety, and the maintaining of adequate police, fire and accident protection and other public services and facilities.
4. This menace is becoming increasingly direct and substantial in its significance and effect.
5. The benefits which will result from the remedying of such conditions and the redevelopment of blighted areas will accrue to all the inhabitants and property owners of the communities in which they exist.

NRS 279.420 Declaration of state policy: Inability of individual landowners to rehabilitate property; remedy by public acquisition. It is further found and declared that:

1. Conditions of blight tend to further obsolescence, deterioration and disuse because of the lack of incentive to the individual landowner and his or her inability to improve, modernize or rehabilitate his or her property while the condition of the neighboring properties remains unchanged.
2. As a consequence the process of deterioration of a blighted area frequently cannot be halted or corrected except by redeveloping the entire area, or substantial portions of it.
3. Such conditions of blight are chiefly found in areas subdivided into small parcels, held in divided and widely scattered ownerships, frequently under defective titles, and in many such instances the private assembly of the land in blighted areas for redevelopment is so difficult and costly that it is uneconomic and as a practical matter impossible for owners to undertake because of lack of legal power and excessive costs.
4. The remedying of such conditions may require the public acquisition at fair prices of adequate areas, the clearance of the areas through demolition of existing obsolete, inadequate, unsafe and insanitary buildings, and the redevelopment of the areas suffering from such conditions under proper supervision, with appropriate planning, and continuing land use and construction policies.
