# Findings

<b>Tentative Map Findings</b>	<b>Staff Review and Analysis</b>
Public services and utilities are available	Infill project, all services and utilities are available
Complies with the Master Plan, RMC, NRS	Complies with some Master Plan policies Meets the minimum RMC standards Complies with NRS

# Findings

<b>Major Site Plan Review Findings</b>	<b>Staff Review and Analysis</b>
Design is compatible with surrounding development	Design of the subdivision is functional, product differs from surrounding development
Design is consistent with development standards	Meets the minimum RMC standards
Reasonably compatible with surrounding development, as conditioned	As conditioned, additional mitigation has been recommended including a buffer, additional landscaping, and enhanced design standards
Not detrimental to the public health, safety, or welfare	Once developed, noise, smoke, odor, dust, vibration, illumination, and other hazards shall be mitigated

# Findings

<b>Cluster Development Findings</b>	<b>Staff Review and Analysis</b>
<p>1. The clustering proposal, compared with a more traditional site development plan, better attains the policies and objectives of this article, such as providing more open space, preserving existing trees and vegetation coverage, preserving view corridors, and preserving sensitive environmental areas such as stream corridors, slide areas, wetlands, and steep slopes;</p>	<p>Increased buffering on the west side may preserve view corridors better than traditional development with no buffer</p>

# Findings

<b>Cluster Development Findings</b>	<b>Staff Review and Analysis</b>
<p>2. The clustering proposal will have no significant adverse impact on adjacent properties or development, or the applicant has agreed to adopt appropriate mitigation measures such as edge matching, landscaping, screening, illumination standards, and other design features to buffer and protect adjacent properties from the proposed clustered development;</p>	<p>The applicant has agreed to adopt a buffer ranging from 5 to 22 feet, plus the 20-foot rear setback.</p> <p>(Buffering between varying sizes of single-family residential parcels would be 30 feet, plus, the rear yard setback.)</p>

# Findings

<b>Cluster Development Findings</b>	<b>Staff Review and Analysis</b>
3. The clustering proposal meets all other applicable requirements set forth in this article or in other applicable ordinances or regulations.	Complies with some Master Plan policies Meets the minimum RMC standards Complies with NRS
