Webinar Registration City of Reno - City of Reno Planning Commission Meeting - 1/15/25

From Michelle Fournier <no-reply@zoom.us>

Date Tue 1/14/2025 11:51 AM

To Michelle Fournier <FournierM@reno.gov>

Hi Michelle Fournier,

Chelsea Fleischman (chelseafleischman@icloud.com) has registered for "City of Reno - City of Reno Planning Commission Meeting - 1/15/25" on: Jan 15, 2025 06:00 PM Pacific Time (US and Canada)

First Name: Chelsea

Last Name: Fleischman

Email: chelseafleischman@icloud.com

Address: 2325 Keystone Ave

City: Reno

Zip/Postal Code: 89503

State/Province: NV

Phone: 7248161469

Questions & Comments: Regarding items 6.3 and 6.4, for possible action, proposed data centers... There's increasing evidence regarding the resource (water, energy) usage on data centers. Will an environmental impact study be conducted before this could move forward?

Do you wish to provide public comment for this Planning Commission Meeting?: Yes
If you answered "Yes" to the previous question, please provide your public comment in the Question & Comments box below.:

Are you attending the meeting as a: Member of the public

Which Ward you live in?: Ward 5

Webinar Detail Link: <https://us06web.zoom.us/webinar/87254775975>

Thank you!

From: elena cox <elenamarie923@gmail.com>
Sent: Wednesday, January 15, 2025 9:42 PM
To: Reno Planning Commission
Subject: Opposition to data centers

Hello,

I am a resident of Reno and I am writing to express my opposition to converting empty buildings to data centers in Reno. This seems extremely short sighted and absolutely against the best interests of the Reno/Sparks community. This will only exacerbate the worsening climate related crises we are already seeing and removes community spaces.

Elena

Webinar Registration City of Reno - City of Reno Planning Commission Meeting - 1/15/25

From Michelle Fournier <no-reply@zoom.us>

Date Tue 1/14/2025 3:02 PM

To Michelle Fournier <FournierM@reno.gov>

Hi Michelle Fournier,

Kelly Jesch (kellyjesch@gmail.com) has registered for "City of Reno - City of Reno Planning Commission Meeting - 1/15/25" on: Jan 15, 2025 06:00 PM Pacific Time (US and Canada)

First Name: Kelly

Last Name: Jesch

Email: kellyjesch@gmail.com

Address: 1639 Watt Street

City: Reno

Zip/Postal Code: 89509

State/Province: NV

Phone: 775-842-2103

Questions & Comments: I would respectfully submit Reno does not want or need the power demand Data center encroachments will cause. I have seen first hand the issues these centers cause. Reno does not need them. Take the hint from other communities who wish they'd resisted.

Do you wish to provide public comment for this Planning Commission Meeting?: Yes
If you answered "Yes" to the previous question, please provide your public comment in the Question & Comments box below.: Case No. LDC25-00022 (Oppidan 5MW Data Center)

Are you attending the meeting as a: Member of the public

Which Ward you live in?: Ward 2

Webinar Detail Link: <https://us06web.zoom.us/webinar/87254775975>

Thank you!

Planning Commission Public Comment

The public comment form has a new entry from the public.

Planning Commission Meeting Date	2025-01-15
Agenda Item or Case Number	Items 6.3 and 6.4 Data Center application approvals
Position	In Opposition
Comments	<p>I am a resident of Reno who is concerned about the climate crisis and its very bad implications for Reno. I am here to implore this commission to make safeguards where large new electrical customers are not rubber stamped as regular warehouses. Data centers operate 24/7, 365 days per year. Their load is a liability on our grid and they MUST generate their own power. Why are they flocking to Nevada? It is obvious to me that we are being exploited for our ridiculously cheap industrial electricity rate, and negligible state tax. This might be tolerated when a factory or business offering substantial long term jobs relocates to our region, but providing valuable City land for banks of humming machines I would call a losing deal and exploitation, and an embarrassment to Reno. Please have some foresight and decline these applications and all subsequent ones until there is a specialized ordinance for data centers with appropriate requirements and standards for this type of development. Their location, water consumption and electrical source should be stringently determined. Yesterday the President</p>

	issued an executive order to facilitate data center buildout. I am a lot less alarmed at this because they will be fast tracked ONLY if they run them on their own renewable energy generation. Why can't we make the same stipulation? Thank you for this opportunity to comment.

Planning Commission Public Comment

The public comment form has a new entry from the public.

Planning Commission Meeting Date	2025-01-15
Agenda Item or Case Number	6.3
Position	In Opposition
Comments	<p>I'm concerned about the environmental impact of the proposed data centers as well as future ones. I'm asking you to please place a moratorium on data center approvals until a planning ordinance specifically for data centers is passed. These are separate types of operations from warehouses and need a separate approval process and should be required to use renewable energy sources for operation, because of their enormous energy use. Thank you.</p>

The public comment form has a new entry from the public.

Planning Commission Meeting Date	2025-01-15
Agenda Item or Case Number	LDC25-00022 and LDC25-00026
Position	In Opposition
Comments	<p>My name is Elena De La Paz and I am making public comment in opposition of both the Oppidan 5MW Data Center and the Keystone Data Center. The development of this center is not in the interest of the residents of the areas they would be developed as they emit mass amounts of greenhouse gases. The development of these data centers would have a highly negative impact on our water shed as it would be taking from our local supply. This is a reckless use of our community's resources and will also impact the Pyramid Lake tribe which is downstream from the Reno Community. I do not want to go to cooking these data centers as our resources should be going directly to our communities. Data centers would also create e-waste which adds to our impact on our environment. The Los Angeles fires are an example of what happens when the community needs are not put first, and that is why I am in opposition of these data centers.</p>

Planning Commission Public Comment

The public comment form has a new entry from the public.

Planning Commission Meeting Date	2025-01-15
Agenda Item or Case Number	LDC25-00022 and LDC25-00026
Position	In Opposition
Comments	<p>Allowing the establishment of a data center is the epitome of irresponsibility of government. Data centers are a leading cause of both energy and water consumption and contribute significantly to climate change as well as strain on our already vulnerable utilities systems. To even consider allowing this in the wake of the devastating LA wildfires and our own local wildfire tragedies feels like a slap in the face to anyone who values the local land, water, and environment. Those devastating scale of ongoing destruction by those fires clearly shows what happens when a communities ecological needs are superseded by the local governments greed and dedication only to money. Approving this data center would only follow the trends of the LA area elected officials and YOU WILL BE RESPONSIBLE when our next natural disaster inevitably occurs locally. If approved, the data center will set an imminently dangerous precedent regarding our local environment and energy systems. With NV energy already trying to pass the buck of wildfire insurance over to your constituents a data center and the</p>

	excessive strain it will put on our electrical systems is an extremely irresponsible consideration to have. Please put the needs of the local community members, the land, water, air, and the first peoples of this land first, instead of pandering to corporate interests who are not only trying to take advantage of your constituents but of you as well. Place people over profits our futures depend on it.

Comments	<p>This is fraud of the highest order. The applicant is pretending a data center is a warehouse. It is not. Nothing will be stored there. It is instead will be a giant computer room with thousands of hard drives, consuming megawatts of electricity, generating lots of heat and noise and tons of pollution. The applicants are corrupt foreign developers that are colluding with city officials to get this approved by hiding its true nature.</p>

Planning Commission Meeting Date	2025-01-15
Agenda Item or Case Number	LDC25-00022 – Oppidan 5MW Data Center
Position	In Opposition
Comments	<p>My name is Kelsey Meno and I have lived in Stead for 7 years and I love my community. I want to express my strong opposition to the proposed data center project in our neighborhood. While I recognize the need for technological infrastructure, this project is ill-suited for our community for several reasons. Strain on the local infrastructure: Our neighborhood simply does not have the electrical or water infrastructure to support a data center. The demands of such a facility could lead to even more blackouts, increased utility costs and water shortages for residents - issues we cannot afford to face. It will use 5 megawatts of electricity which is the equivalent of 5,000 homes. Minimal Economic Benefit: This facility will reportedly create only 5 permanent jobs. With such a small employment impact, it is hard to justify sacrificing our neighborhood's resources and space for so little in return. Our community deserves investments that provide meaningful and sustainable economic opportunities. Environmental and Biodiversity Concern: This proposed project would negatively impact the local biodiversity and</p>

	diminish the environmental quality. Even a small edge data center will change the environment because of the heat from the high amount of electricity that is used and the high amount of water used in the cooling system. Community Priorities and Smart Land Use: Disappearing land in our neighborhood should be used to benefit the community, whether for parks, community centers, or businesses that create jobs and services. Let's prioritize projects that address the needs of current and future residents rather than sacrificing community space for a data center that offers little in return. I urge the council to reject this proposal and explore development opportunities that align with our neighborhood's needs and values. Thank you for your time and attention.

Comments	<p>I am against the definite increased use of energy and misallocation of water that will occur to run and cool these data centers. With Reno becoming the nation's fastest warming city, the city should be cognitive of its participation in the climate crisis and not seek opportunities that grossly enlarges the use of electricity and water, while simultaneously diverting these resources from the community.</p>

Comments	<p>I oppose the construction of new data centers for many reasons, but I'll just say two here: First, data centers require a lot of ENERGY to operate, and regular energy customers (read: EVERYONE) will have to foot the bill to build out infrastructure. So this is unfair. On top of that, data centers make reaching sustainability goals that much harder, as they consume vast amounts of electricity. Second, data centers use a huge amount of WATER. We all know we live in a desert. We all know that this area's water is already stretched to its breaking point by rapid growth. Water doesn't grow on trees! Where is the water coming from? The river is already so changed beyond its former state, just in 100 years of poor water management. Do not make this problem worse!! Make things better and say no to these costly, wasteful, unfair data centers!</p>

Comments	<p>Water is a valuable, limited resource for the local Reno community. Especially in the wake of the devastating LA fires, we should be more mindful about where we allocate our water. These proposed data centers require large amounts of water to cool down. This is a dangerous use of a valuable, limited commodity. We should wait until technology is more advanced to build these data centers. There is no rush when our lives and the health of the planet is at stake.</p>

Comments	Data centers should be denied — we don't have the energy or water. At most, their proposals should be put on hold while the city and county determine if there is sufficient water and power for any of them to use and if they deserve our resources more than our residents. Burden of proof should be on data centers for everything and their assertions should be checked by some kind of impartial party.

Agenda Item or Case Number	Item 6.3- case no. LDC25-00022
Position	In Opposition
Comments	<p>I am a lifelong Reno citizen and employee of the City. I am writing today to urge the council members not to vote to proceed with the two proposed conditional use permits for these data centers. The Piedmont Environmental Council recognizes that data centers can consume 3-5 million gallons of water for cooling. Data centers put an excessive demand of our energy and water, without providing much benefit to the public. I am worried about the long and short term effect that these two projects would have on our communities and resources, and urge the council to issue a moratorium and delay the approval of any new data centers until the council can pass more regulations.</p>

Webinar Registration City of Reno - City of Reno Planning Commission Meeting - 1/15/25

From Michelle Fournier <no-reply@zoom.us>

Date Wed 1/15/2025 4:57 PM

To Michelle Fournier <FournierM@reno.gov>

Hi Michelle Fournier,

Anna Poff (apoff775@gmail.com) has registered for "City of Reno - City of Reno Planning Commission Meeting - 1/15/25" on: Jan 15, 2025 06:00 PM Pacific Time (US and Canada)

First Name: Anna

Last Name: Poff

Email: apoff775@gmail.com

Address: 5465 N Scarsdale Cir

City: Reno

Zip/Postal Code: 89502

State/Province: NV

Phone: 775-414-9516

Questions & Comments: I am in support of issuing the special use permit for a data center. Please carefully consider the effect your decision will have on property owners rights. Based on its zoning and current language, it should be allowed. I am in favor.

Do you wish to provide public comment for this Planning Commission Meeting?: Yes

If you answered "Yes" to the previous question, please provide your public comment in the Question & Comments box below.: Yes

Are you attending the meeting as a: Member of the public

Which Ward you live in?: Other

Webinar Detail Link: <https://us06web.zoom.us/webinar/87254775975>

Thank you!
