

## Development Review Public Comment

## Exhibit E

The public comment form has a new entry from the public.

<b>Case Number</b>	LDC25-0049
<b>Position</b>	In Opposition
<b>Comments</b>	<p>I mark opposed merely to state a desire to hear about the development's plan to address increased use of the surrounding infrastructure as it pertains to traffic on an already dangerous intersection at Echo Valley and South Meadows. The proposed map would expand this intersection and I'd like to encourage the advisory board to have the developers aid in expanding this public infrastructure during the building process to avoid making an already dangerous intersection into a deadly one. I'm not sure what the solution is, but its already hard to navigate this intersection as a resident. Thank you.</p>
