Given the Consultant's familiarity with the project, it is tasked with evaluating and recommending repairs to address these concerns.

Key challenges include concrete deterioration, such as instances of spalling and cracking, as well as wall deflections. These issues necessitate a comprehensive assessment of the current state of the structures and recommendations for repairs where required. For recommended repairs, the Consultant will provide design drawings and specifications adequate to complete the work.

- 1. The Consultant will inspect and determine the condition of approximately 1.75 miles of the walls and adjacent structures included in the ReTRAC project.

Where required, the report will include calculations addressing the structural adequacy of the existing structures as well as an evaluation of the existing structure deflections and if those deflections are within allowable tolerances.
3. Based on the inspection report and preliminary recommendations, the PM and the Consultant will agree on which repairs are required for the site.
4. The Consultant will provide rehabilitation recommendations in the form of a completed report, design drawings, and project specifications and special provisions in the agreed to completion intervals up to and including producing a package for Advertisement.
5. The Consultant will provide a general maintenance plan for:

If extended for longer than 4 weeks, additional budget shall be negotiated and agreed to in writing by both the City and the Consultant to cover the Consultant's extended administrative costs.
