04	Promote regional collaboration.	Shared communication & training regionally.	Uncoordinated response	Coordinated response	Timely coordinated response
		Consolidate regional Dispatch.	3 dispatch centers	Consolidation with 1 or more partners	Centralized Dispatch

STRATEGIC FRAMEWORK

The City of Reno Fire Department operates under a set of governing statements that guide everything from long-term planning to day-to-day operations and interactions with RFD personnel and the communities we serve.

MISSION

The Reno Fire Department will provide our citizens and visitors the best possible all hazard emergency service in the protection of lives and property and a proactive approach to community risk reduction.

PHILOSOPHY STATEMENT

As a Fire Department, we provide reliable public services in a safe, efficient, and effective manner using all available resources and opportunities.

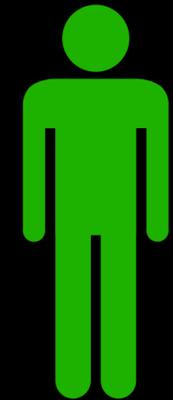

CORE BELIEF

Every decision should be based on delivering the right resource to the right call at the right time to drive positive outcomes.

CHIEF'S MANAGEMENT PHILOSOPHY

CORE VALUES

- The lives and well-being of our citizens, visitors and department members are our highest priority. We are fiscally responsible in all we do.
- We respect our community by providing the best possible emergency response based on concern, compassion, and professionalism in everything we do.
- We provide the highest level of public safety to our citizens.
- We work as a team to accomplish the department's missions and goals through open communication, cooperation, and recognition of shared successes.
- We encourage and promote pride, loyalty, and a true sense of ownership in our department and our community.
- We seek responsibility and take responsibility.
- We are committed to openness and honesty in all situations.

Cardiac Arrest

The Brain LOSES

Oxygen Stores

Within 20 seconds

Prognosis for Cardiac Arrest Survivors

Survival after a [cardiac arrest](#) is dependent on many factors.

Factors before cardiac arrest:

- Age
- Ethnicity
- Poor health including diabetes, cancer, infection, kidney disease and stroke

Factors during cardiac arrest:

- Time between collapse and start of CPR/defibrillation
- Quality of CPR/defibrillation
- Whether survivor had neurological function during or immediately after CPR

**Why will these residents NOT
receive Quality care?**

Thank you for your time.
