

(5) Design of Guest Quarters in Detached Structures

- a. All detached guest quarters shall maintain a single-family appearance and shall be subordinate to the principal dwelling unit in size, location, and appearance. New detached guest quarters shall be architecturally compatible with the principal residential building. Architectural compatibility shall be achieved by including all of the following elements in the accessory building design:
 1. The exterior finish is constructed with materials compatible with the existing principal building materials. The new materials must be either identical or similar to the original building materials. For example, details of synthetic siding should match that of traditional wood siding.
 2. Contemporary interpretations of architectural features such as trim, fenestration, window frames, dormers, columns, gables, decorative wood, or metal work found on the existing principal building are used.
 3. The roof pitch is the same or within the range of the roof pitches on the existing principal building.
- b. The front door of the detached guest quarters shall not be visible from the same street that the front door of the principal structure faces.
