To Whom It May Concern,

I am writing as a long-time Reno resident and a passionate tennis supporter. My family and I have lived in this city for 17 years and have greatly enjoyed utilizing the public tennis courts provided by the City of Reno. However, since Lake Ridge's closure, it has become increasingly difficult to play tennis during the winter months. This challenge has become even more pronounced now that our children are actively involved in the sport.

The question has arisen within our family: How can we continue to play tennis in the winter when the courts are covered in snow, and the temperatures are too cold for outdoor play? Upon reflection, I believe this is a significant issue for the entire Reno tennis community.

As a city that continues to grow in size and population, Reno lacks an important facility: an indoor tennis court. Given the city's expansion and the growing interest in tennis, I would like to formally request that the City of Reno consider the development of an

indoor tennis facility.

An indoor court would not only allow tennis enthusiasts to play year-round, but it would also create opportunities for our local players to train throughout the winter, enabling Reno to participate more fully in national competitions.

The success of indoor pickleball facilities highlights the demand for year-round racket sports. It is a missed opportunity that Reno, a city with a strong tennis community, does not have an indoor tennis facility.

I would appreciate the opportunity to discuss this matter further with anyone in a position to help make this vision a reality. Thank you for your time and consideration. I look forward to the possibility of working together to enhance our community's tennis offerings.

Sincerely,  
Promilla Mohan Patel  
Reno Resident
