A new comment has been submitted for the Reno City Council Meeting held on: 2024-06-05.

Section:

D Items - Department Items

Item:

D. 1 – Presentation, discussion, and potential approval of a number of improvements to the Truckee River corridor along Riverside Drive using ARPA funds.

Position:

No position stated - Concerned or Neutral

Are they speaking in person?

No, I am submitting a written comment only.

If no, enter comments below:

Riverside Drive Park Design – Arlington to Booth Will the public and important stakeholders (One Truckee River and Keep Truckee Meadows Beautiful for example) have input into the design? What does the 'bioengineered' section between the river and the path mean? I'm assuming 'Not concrete' at the very least. This will be a critical transition zone which should not be devoid of vegetation. The existing vegetation, including the mature trees contribute to bank stabilization, provide important bird habitat, create shade for fish and waterfowl along the river's edge as well as for people using the area. Consequently, the mature trees should remain intact. Lighting The picture of the lights to be used along the corridor does not provide any information regarding height, size, location or if these lights are dark sky compatible. The lights should blend in with the surroundings and be dark sky compatible. No mature trees should be removed during the installation of lighting structures.

ACKNOWLEDGEMENTS:
