Hi,

I do not yet support this expansion. This is supposed to be a temporary site to transition the homeless to more permanent housing. Can you tell me what is the success rate%? Also, as a property owner in Washoe County, has the crime rate increased in that area since its inception? What is your policy when you find them doing drugs or committing crimes? Does the local government give them money and if so, how are they made accountable for what they use the money for? In CA, many are given money by the government and some are used to buy drugs. I do not want the expansion to become looking like LA and some parts of San Francisco! Thank you for considering my comments and concerns!

Regards  
Brenda
