Dear Council Member Brekhus:

I am writing to extend my appreciation for your well thought-out concerns about the Sierra Senior Care PUD Amendment that you expressed during the December 14, 2022 City Council meeting (Case No. LDC2200050).

I respect your fortitude in the face of your colleague's denigrating characterizations of your comments as hubris and anathema to good policy makers.

You are very much a part of the solutions that affect this community, in spite of your colleague's unfortunate and persistent public statements to the contrary.

My appreciation of your contribution to City Council extends well beyond this particular development proposal. You have consistently attempted to highlight incremental erosion of the stability of neighborhoods, piecemeal spot zoning, conformance with the Master Plan, and lack of adherence to Title 18 and the bigger picture it was intended to implement. For the record, I am not the only member of the public who notices and appreciates your contribution.

Thank you for your service to the City of Reno and its residents, and for being a vocal supporter of sensible planning with awareness of public safety, infrastructure, and the effects of development on surrounding areas.

Sincerely,

Donna Keats
Reno Resident

Public Comment <publiccomment@reno.gov>

Thank you for standing up for public safety and your colleague [Case No. LDC2200050]

Dear Council Member Ebert:

I am writing in response to comments you made during the December 14, 2022 City Council hearing for the Sierra Senior Care PUD Amendment (Case No. LDC2200050).

Thank you for stating that it was valuable for a Council member to have brought up public safety during this hearing, and that it was valid to question the safety of residents and users of Virginia Lake Park. I appreciated your statement that was unfair to make certain assumptions about a colleague who attempted to bring public safety concerns forward for Council's consideration.

I was very happy that you stood up for the public safety conversation that was belittled by one of your colleagues. I was pleased to hear you say that this is why we have a Council, and that it's unfair to insinuate that a Council member was not trying to be part of the solution when she questioned adequacy of access and impacts to public safety.

I hope that you continue to be a supportive voice for the public and an advocate for civil behavior by City Council members.

Sincerely,

Donna Keats
Reno Resident
