Your Name (First and Last)	Alan Jordan
Email Address	alan@alanjordan.com
Address	1490 Patrick Avenue
Phone Number	7753226302
Which City of Reno Ward do you reside?	Ward 1
Council Meeting Date	Apr 26, 2023
Do you wish to speak in person at the meeting?	No (Digital comment only)
Agenda Item	B6
Please state if you are in favor or in opposition of the agenda item in which you are commenting:	No position stated - Concerned or Neutral
Your Comment	<p>I urge you to accept the \$800,000 HUD grant for a rooftop solar project at the Moana Springs Community Aquatics and Fitness Center. This is another accomplishment that will help our city be green, and that will help to attract quality people to Reno as well as benefit our residents. Thanks to Jenny and Suzanne for their continuing efforts.</p> <p>I appreciate The community solar project at the lot behind station 3 too.</p>

Agenda Item B6-Rooftop Solar Project Moana

Please state if you are in favor or in opposition of the agenda item in which you are commenting: In favor

Your Comment I support a rooftop solar project at Moana Community Center. Reno is incredibly vulnerable to climate change, particularly destructive wildfires and water shortages that threaten our community's health and prosperity. Projects like this are critical to reducing the pollution driving extreme weather and show how we can use locally generated solar energy that is much healthier for the City. I appreciate the recent LEED Gold Certification and look forward to Reno's leadership in the clean energy transition.

Agenda Item B6

Please state if you are in favor or in opposition of the agenda item in which you are commenting: In favor

Your Comment I am so happy to see The City of Reno working towards rooftop solar on the Moana Spring Community Aquatics and Fitness Center! Climate change is a high priority issue for me. I am proud to live in a community that recognizes the threat and has a Sustainability & Climate Action Plan to help us tackle the issue. Green energy and building electrification are critical components of any plan. Reno should be using abundant locally generated energy from solar to power our buildings. Rooftop solar on the Moana Community Center is an important step. Thank you!

Agenda Item	Rooftop solar project at Moana Springs Aquatic and Fitness Centerc
Please state if you are in favor or in opposition of the agenda item in which you are commenting:	In favor

Your Comment

My name is Nancy Litchfield, I reside in Ward 2, and I am writing to express my enthusiastic support for the rooftop solar project at Moana Springs Aquatic and Fitness Center. Although just one step toward achieving the city's sustainability goals, a rooftop solar array at the Moana Springs Center would be a very visible step that would increase awareness of solar potential and display the City of Reno's commitment to finding and implementing clean, renewable energy sources as it transitions away from fossil fuels. Reno is fortunate to have abundant solar resources close at hand, and we should take advantage of this plentiful local resource as much as possible.

As a grandparent of four little tots ranging in age from two to eight years, I fear for their uncertain future amid dire climate predictions of overheating and extreme weather, and for this reason I volunteer with Citizens' Climate Lobby, working for effective solutions to reduce carbon pollution while mindful of the need to support the disadvantaged, strengthen the economy and encourage innovation. I appreciate the many climate achievements the city of Reno has made, including overall reductions of community-wide emissions, adding more electric vehicles to its fleet, installing a community solar project and a solar-and-storage project to name just a few, all of which will lead to a cleaner, safer, and healthier future. To promote further environmental, economic and health benefits, I urge the City Council to approve the Moana Springs solar project.

To whom it may concern,

I am excited to support another great step for our Sustainability and Climate Action plan from our Sustainability Division! The \$800,000 grant for Solar at the Moana Pool will be a great opportunity for the City to show other organizations how to include solar in their new construction and maybe even in their existing buildings. Once in place, the system will be a great destination for businesses and organizations around our region to tour and see for themselves how this type of commercial scale project can work for their organization.

Thank you for continuing these steps towards creating a sustainable future for our community!

Philip Moore

Agenda Item	B6
Please state if you are in favor or in opposition of the agenda item in which you are commenting:	In favor

Your Comment

I am a resident of rural Washoe County and concerned about the most pressing crisis of our civilization--climate change.

I support a rooftop solar project at the Moana Springs Community Center. Rooftop solar compliments the use of geothermal energy within the complex. When complete, the Moana Pool and Community Center will be a gem within our community with potential to attract visitors to Reno. What better way for the city to demonstrate its commitment to the sustainability and reduction of greenhouse gas emissions by installing solar whenever possible in City-owned structures? We are fortunate in the Truckee Meadows to have an abundant supply of solar energy.

Let's take advantage of our good fortune!

The Pool and community Center will promote fitness and good health. Clean solar energy is better for our entire community.

The installation of rooftop solar will add to the sustainability measures the City has already taken. I applaud the creation of the 2019 Sustainability and Climate Action Plan, the solar + storage project at the Public Safety Center, and initiatives to increase micromobility infrastructure--particularly those promoting bicycle transportation. Thank you.
