I've read thru the application and it makes it seem as if that road is not used by anyone. However many residents use that road daily.

Everyone goes up that way to access trails via walking, HOV, and other methods.

I've used it personally to drive up and collect trash that no one else will pick up. Cutting that road off means trash just stays there.

It's was mentioned that it didn't obstruct fire fighting efforts, but there has been many fires in this area alone in the past couple years.

That road would make it very easy for firefighters to access any fires that might be coming down the hill or traveling up. Which could potentially save many homes in this fire prone environment. Not too long ago peavine was on fire and you could walk up the nearest hill in the orrcrest area and see flames approaching.. I like the idea of fire fighters having many access points to save properties.

Union Pacific can indeed access the railroad from other points, but not other residents. However, there has yet to be any major work on this railroad. I'm sure it would make any issues that the railroad might have, easier to fix if the road that was design for them remains open (We wouldn't want any trains derailed around here).

I know many people in this neighborhood would approve of keeping that area open for all to enjoy and not just one investor.

I live in the Orrcrest Dr neighborhood and currently use the area north of Orrcrest Dr on Carson lane to walk my dogs and to access the other trails/dirt roads in the area for exercise 3-6x/week. Having the proposed area blocked off or abandoned will limit how I can access the trails and will also limit the ability of fire trucks/first responders to access the area if there were to be a fire or other emergency since that is the only easy vehicle access point near Orrcrest drive and we are in a high fire risk area. For these reasons I disagree with the proposed abandonment of this section of Carson lane. Thanks for your consideration.
